

Subject: Irradiation of food**Date:** Thu, 13 May 1999 16:21:28 -0400**From:** Joy Gurule <jgurule@chubb.com>**Organization:** The Chubb Corporation**To:** wyradmin@mail.house.gov

hello, i'm unnerved at reading about the irradiation of food. i am an organic consumer, because of the fact, that there is so much chemical use in our foods today. being an american, i find it's not even safe to be organic. i feel as an american it's my right to choose whether i want radiation in my food. does this mean that i'll have to grow my own garden because it's not safe to eat here in america. what a shame. i feel it should be printed on the lable if a product has been irradiated, and not the use of masking names like "cold pasteurization" or "electronic pasteurization". Please help.
